

Taking the Paper Out of Work

Paper-based work is a soul-crushing, profit-sapping drag on individual, team, and company productivity. Your personnel are smothered by paper, hindering innovation and creating a competitive disadvantage. But what if there was a better way?

By digitizing your documents, you can easily locate documents in a shared platform, extract the necessary data to eliminate keystrokes, and streamline your business processes with automated workflows.

Making the Switch to Digital

If you could snap your fingers and make all the physical paper in your business digital, what would that mean to you?

- Would your people waste less time searching for and sharing copies of documents?
- Could you onboard new customers and employees faster and more accurately?
- Would your costs go down and competitiveness go up?
- Would you reclaim all the wasted space currently inhabited by file cabinets?

Answer

All of the above and also create opportunities to generate new revenues.

The Square 9 Difference

The Square 9 AI-powered intelligent information management platform takes the paper out of work and makes it easier to get things done with digital workflows that automate many aspects of how you work today. We make it easy by extracting information from scans or PDFs, storing documents in a searchable archive, and building digital twins of your current processes through graphical workflows.

Digital Transformation

Quickly convert documents into information you can use to run your business more efficiently while making better-informed decisions.

Business Process Management

Put your documents and the information they contain into motion so that information flows efficiently throughout your organization.

Content Management

Securely manage your digitized documents in a cloud repository that ensures your information remains private while making it accessible, no matter where you're working.

Forms Automation

Throw away your paper forms and transform the way you request information from vendors, customers, and even employees through the use of secure web form automation.
